

Lead Awareness

Time Required 2 Hrs

Regulatory Requirement References

OSHA 1926.62, 1910.1025

Requalification Period 1 Yr

Pre-Requisites

None

Minimum # Students 2

Maximum # Students 8

Additional Course Material None

General Overview

This training course is intended to provide information on regulatory requirements involved in working with lead, medical surveillance programs, and the adverse health effects associated with excessive exposure to lead. This course also provides information on the types of activities involving worker exposure to lead and the feasible engineering and work practice controls to reduce these exposures.

Expected Outcomes

Students completing this course will be able to describe the effects of lead exposure on the human body, identify the symptoms of lead poisoning, explain the purpose of a lead exposure plan, describe the guidelines for safe work practices while working with lead containing material and identify the jobs where lead exposure may be an issue.

Lead Awareness Continued

Topics Covered

Permissible Exposure Limits, Exposure assessments, Symptoms that may indicate exposure to lead, Medical Surveillance, PPE, Engineering Controls, Housekeeping & Personal Hygiene, Safe work practices

Implementation Mechanism

Training shall consist of lecture and video presentation

Client Supplied Equipment

DVD/VCR player and corresponding viewing equipment

Client Supplied Policies and Procedures

Policies/procedures related to working with lead, medical surveillance program
