

Scaffold Safety - Hazard Awareness

Regulatory Requirement References

OSHA 1926.454, MIOSHA Part 5, 12, and 21

Time Required 4 Hrs

Requalification Period 3 yrs

Pre-Requisites

Fall Protection

Minimum # Students 3

Maximum # Students 12

Additional Course Material Yes

General Overview

This Scaffold Industry Association (SIA) course is designed to ensure that any employee who performs work on scaffolding recognizes the associated hazards and understands the procedures to control or minimize those hazards. Also included is a review of the correct procedures for erecting, maintaining, and disassembling a fall protection system.

Expected Outcomes

Students completing the scaffold user awareness course will be able to identify and describe the different hazards involved with scaffold work, proper construction and placement of scaffolding, correct usage and handling of scaffolds, and state maximum intended load and load-carrying capacities.

Scaffold Safety - Hazard Awareness Continued

Topics Covered

Scaffolding regulations and standards, recognition and preventative measures for safety hazards associated with work tasks, work procedures, personal fall arrest system inspection, care, and use.

Implementation Mechanism

Training shall consist of a combination of formal instruction (e.g., lecture, discussion, video tape, written material), practical training (demonstrations performed by the trainer and practical exercises performed by the trainee), and evaluation of the students performance

Client Supplied Equipment

CD / VCR player and associated audio-visual equipment, scaffolding and fall protection equipment to be used in training.

Client Supplied Policies and Procedures

Procedures or policies relating to scaffolding and fall protection.
